

Basic education for the scientific use of laboratory animals

EU function a

Course information

WS 2025

This course is specifically designed for all actively involved in animal experiments or related fields.

The course language is English.

The course takes place in person

Dates

The course takes place twice a year (summer semester & winter semester).

Course dates are published on our homepage.

Number of Participants

Summer semester: max. 35 participants

Winter semester: Number of participants is limited

(The availability depends on the number of participating Molecular Medicine Master students as the course is part of their official curriculum.)

Seats will be allocated in order of receipt of registration.

Structure

The course consists of theory modules (& written test) and practical modules.

Theory modules:

- Take place in course week 1
- Written test in course week 2
- Required attendance of 80% and positive evaluation of the written test (60% correct answers)
- Test can be repeated twice

Practical modules:

- Take place in course week 3 and/or 4
- Participants are split in two groups
- A preferred group can be chosen on the registration form. Please note: There is no guarantee, the preferred group will be the fix group to participate in the end!

Prerequisites for participating the practical modules:

- Attendance in theory modules and positive evaluation of the written test

Participation is possible for the full course or selected module packages:
